

LMS Feedback Form (User Experience Evaluation)

We are 2nd year students from the Department of Computer Science at the Trincomalee Campus, EUSL. As part of our Human-Computer Interaction (HCI) module, we are working on a project titled "UI improvement". This survey is designed to gather your thoughts and opinions to help us improve our understanding of user interactions and design on **LMS- browser version**.

Please note:

1. Your answers are completely anonymous.
2. The information you provide will be used solely for research purposes related to our project.

We appreciate your time and valuable input. Thank you for helping us improve our understanding of user experience!

Course names should be in same name format, it will be help to find the courses easily. Some lecturers adding the course name in differend format, that courses shown with other semester courses. Dinamic UI designs are expected.

We are 2nd year students from the Department of Computer Science at the Trincomalee Campus, EUSL. As part of our Human-Computer Interaction (HCI) module, we are working on a project titled "UI improvement". This survey is designed to gather your thoughts and opinions to help us improve our understanding of user interactions and design on **LMS- browser version**.

Please note:

1. Your answers are completely anonymous.
2. The information you provide will be used solely for research purposes related to our project.

We appreciate your time and valuable input. Thank you for helping us improve our understanding of user experience!

We can upload assignments below 20MB so sometimes we have to divide the assignment and submit separately so it's better if we can share file more than 20MB

LMS Feedback Form (User Experience Evaluation)

We are 2nd year students from the Department of Computer Science at the Trincomalee Campus, EUSL. As part of our Human-Computer Interaction (HCI) module, we are working on a project titled "UI improvement". This survey is designed to gather your thoughts and opinions to help us improve our understanding of user interactions and design on **LMS- browser version**.
